### DUAL FREQUENCY AND NEW DESIGN

The new TOP transmitters are flexible, modern, and functional, thanks to the double frequency technology. The range includes 24 transmitter models divided into six different colours: grey, blue, black, yellow, green and pink.

Available with 2 or 4 channels, the transmitters can exploit either fixed code or rolling code technology to give you the highest levels of security and comfort.

# THE ADVANTAGES OF CAME TOP TRANSMITTERS

- **24 available models** to choose the solution that best suits your needs.
- **Two or four-channel transmitters** to decide how many operators to control.
- Speed and security with the **fixed-code and rolling code models**.
- **Six available colours**: one for each member of the family.
- Powered by **just one CR2032 battery**.
- The **low-battery functions** alerts you when battery is almost flat.
- The new **TOP** transmitters are available alone, or in the **handy 6-transmitters KIT**.
- Designed to be **linear, fresh and unique**.

## DUAL-FREQUENCY TECHNOLOGY AT YOUR SERVICE

All of the new TOP-series transmitters feature double-frequency technology: the signal is sent over both the 433.92 MHz and the 868.35 MHz frequencies.

This innovative approach eliminates any reception problems due to frequency overuse, without having to replace the transmitter.

## SECURITY MADE-TO-MEASURE FOR YOU

The new range of CAME transmitters lets you choose from 12 - **fixed-code technology** - models with black keys, when you need quick and simple duplication or, 12 - **rolling-code technology** - models with white keys, when you need additional security, to regenerate the transmitting code at regular intervals.

## LOW-BATTERY FUNCTION

The low-battery function alerts you when the battery is almost flat. When using the transmitter, the LED does not flash, remains on, to let you know it's time to replace the battery.

### BATTERY FULL

When the transmitter is activated the LED flashes.

### BATTERY FLAT

When the transmitter is activated the LED stays lit.

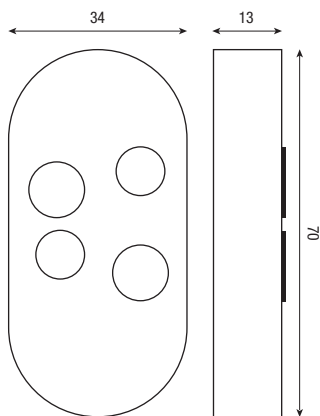

### ROLLING CODE

### FIXED CODE

## DIMENSIONS

## MODELS

The new range of TOP transmitters brings you flexibility.

There are three distinct solutions:

- Single transmitter
- Kit with six, four-channel, fixed-code transmitters - one per colour
- Kit with six, four-channel, rolling-code transmitters - one per colour
